STEP 2 — REORDER CONTROL PANEL · "the fuel light for every SKU"

Reorder Point = forecast daily demand x lead time + safety stock. Status flags 🛑 when stock on hand falls to/below it. System recommends; founder decides.

SKU	Price ₪	Lead (days)	Stock on hand	Avg/day (7d)	Avg/day (14d)	Avg/day (28d)	TikTok idx (0-100)	Viral x	Forecast /day	Safety stock	Reorder point	STATUS	Suggested order qty	Days cover	₪ contribution if OOS/day
Freeze-Dried Candy Mix	180	14	2500	354	329	309	88	1.28	432	220	6268	🛑 REORDER NOW	9816	5.8	23,328
Spicy Korean Ramen Bundles	320	30	5000	239	233	241	64	1.04	247	142	7552	🛑 REORDER NOW	6010	20.2	23,712
Giant Bubble Gum Tubs	220	7	3200	156	170	175	45	1.00	164	70	1218	🟢 OK	0	19.5	10,824
Assorted Chocolate Crunch Bars	150	21	3000	173	168	163	70	1.10	186	108	4014	🛑 REORDER NOW	3618	16.1	8,370
Sour Belts & Bulk Packs	120	7	2600	119	120	120	50	1.00	120	42	882	🟢 OK	0	21.7	4,320

How to read this panel:

- Forecast/day = weighted recency (50% of 7-day, 30% of 14-day, 20% of 28-day) x viral multiplier.
- Viral x rises with the TikTok engagement index (leading signal) — pre-empts a spike before sales fully show it.
- Safety stock = 1.65 x demand volatility (st-dev) x √lead time → ~95% service level; bigger when sales are choppy or lead times long.
- Reorder point (the fuel light) = forecast/day x lead time + safety stock. Order BEFORE stock hits it, because restock takes the lead time to arrive.
- ₪ contribution if OOS/day = forecast/day x price x 30% — an illustrative exposure if the item becomes unavailable, not a claim of today's actual loss.

PopCart — Morning Control Dashboard

Prototype using case baselines + illustrative operating data. All figures live-linked to the Control Panel.

SKUs to reorder TODAY	₱ contribution exposed if OOS/day	Viral items rising 🔥
3	55,410	1

TODAY'S ACTION LIST (system recommends — founder approves)

SKU	Status	Suggested order qty	Days cover left	₱ if OOS/day	Trend
Freeze-Dried Candy Mix	🔴 REORDER NOW	9816	5.8	23,328	🔥 rising
Spicy Korean Ramen Bundles	🔴 REORDER NOW	6010	20.2	23,712	steady
Giant Bubble Gum Tubs	🟢 OK	0	19.5	10,824	steady
Assorted Chocolate Crunch Bars	🔴 REORDER NOW	3618	16.1	8,370	steady
Sour Belts & Bulk Packs	🟢 OK	0	21.7	4,320	steady

"Reorder before the shelf is empty — not after. The fuel light, for snacks."

PopCart PH — Forecasting & Reorder Control System (prototype)

Built for LAMBO 2026, Slide 9. A working demo of the proposed decision process — not PopCart's finished or live system.

THE 5-STEP WORKFLOW

1. UPDATE — Start with scheduled exports into Excel/Power Query, 2–3×/day. Use an approved connector later if PopCart chooses.
Replaces the manual twice-a-day Excel — like switching from checking your bank balance twice a day to online banking.
2. COMPARE — estimate recent demand, then compare days of stock with supplier delivery time.
3. WARN — flag products that may run out before the next delivery can arrive.
4. DECIDE — founder checks cash, supplier availability, and minimum order size before approving.
5. LEARN — compare alerts with actual results weekly; add trend signals only after the basic data is reliable.

WHY IT FIXES THE PHP 7.35M LEAK

Today PopCart reorders on gut feel and only sees empty shelves AFTER they happen — fatal when restock takes 14–30 days.

The reorder point is the low-fuel light: it warns with enough road left to refill before the tank hits empty.

Note the long-lead items (ramen 30d, choco 21d) trigger earliest — exactly where blind reordering hurts most.

HONESTY / ASSUMPTIONS

- CASE-BASED: product velocity, price, and supplier lead time. ILLUSTRATIVE: daily history, current stock, and trend index.
- Profit-at-risk uses a conservative 30% CONTRIBUTION margin (recovered sales still pay platform fees + shipping), not 50% gross.
- $Z=1.65$ (~95% service level). Weights, safety days, and the viral cap are tunable weekly.

AI-USE DISCLOSURE

Proposed starting tools: Excel + Power Query + a barcode tool, building on PopCart's current Excel process. No custom app required.

This prototype's formulas + sample data were drafted with AI assistance and verified by the team against the case exhibits.
